

## SLIDING SHELVES SAVE SPACE

## A REVOLUTIONARY IDEA FOR STORAGE

Increase your storage space by 40-70%! X5 movable steel shelving system recovers wasted floor space by turning aisles into more storage area. Shelving units slide effortlessly on our exclusive patented ball bearing track system.

### EASY TO USE AND CUSTOMIZE

No tools are required to assemble X5. The sliding tracks are not permanently installed to the floor for complete flexibility. Just lay on a smooth surface or low carpet pile and you are ready to go. X5 is easy to customize, reposition or add units to. Design allows for retrieval of contents from both sides.

### CONVERT ISLE SPACE INTO STORAGE SPACE

X5 sliding storage on tracks increases usable space 40-70% by converting aisles into more storage area. Using the same square footage, the example below yields an additional 384 square feet of storage space.

### HEAVY DUTY

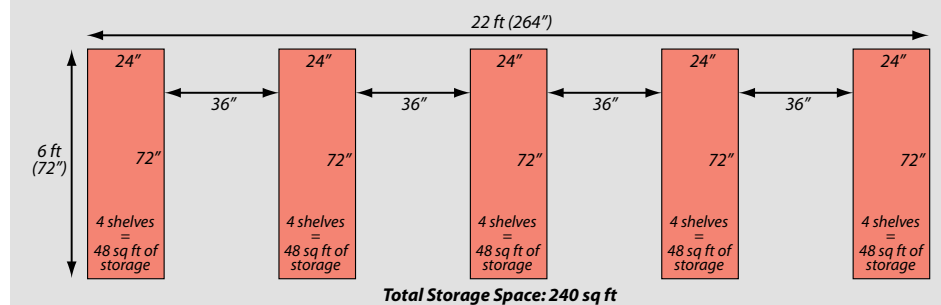

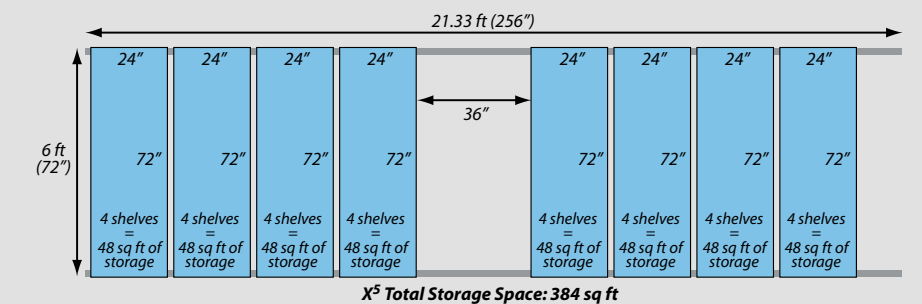

Coated chrome-plated shelves are made of 2, 5, and 7 gauge steel; posts are 19 gauge steel. Each shelf supports up to 800 lbs. evenly distributed Extra wide 72" shelves.

### SAFETY FEATURES

A "step on/step off" safety brake comes with each roller assembly, allowing users to lock units into place while loading and retrieving. Open wire design allows sprinkler system penetration and maximizes visibility and airflow for your sensitive items.

Tracks lay on hard floors, no bolting necessary.

Even at 800 lbs. per shelf capacity, Shelves glide effortlessly on tracks. Experience this dynamic feature to really see the difference X5 makes.

## GAIN CAPACITY AND ACCESSIBILITY— GET ORGANIZED AND INCREASE PRODUCTIVITY

Before

This typical storage room shows an inefficient use of the space with freestanding shelves.

After

Two rows of X5 Heavy Duty shelving were installed side by side, leaving one aisle and gaining over 100% more storage area.

Available in 18" or 24" deep shelves and 36", 48", 60" or 72" wide shelves.

24" and 18" deep units can be used on the same track.

### Locking brake system for added safety.

Newly designed Brake System protects shelves from sliding on their own. Holds shelving units firmly in place while loading or unloading stored items.
